Objective

Computer Science Engineering graduate (2026) pursuing an MTech in Artificial Intelligence, with hands-on data analytics projects in SQL, Python and Power BI. Seeking an entry-level Data Analyst role where I can clean data, find patterns and present clear insights that support business decisions.

Education

MTech in Artificial Intelligence | *Anurag University* | *Ongoing*

Saveetha School of Engineering

B.E. in Computer Science Engineering | CGPA: 8.16 | *2022-2026*

Resonance Junior College

Intermediate (Class XII) | *90.8%* | *2020-2022*

Projects

Superstore Sales Dashboard | HTML, Power BI, Power Query, DAX

- Built an interactive Power BI dashboard on Superstore sales data to track sales, profit and performance by category and region.
- Cleaned the data with Power Query and created DAX measures for key KPIs.

Student Risk Prediction System | Python, RNN, CRNN

- Developed a predictive system to identify academically at-risk students using historical data.
- Applied RNN and CRNN models to analyze sequential academic patterns and enable early intervention.

IPL 2026 SQL Analysis | MySQL

- Analyzed IPL 2026 match and player data using MySQL queries to find team and player performance trends.
- Used joins, aggregations and subqueries to answer key questions on top performers and match results.

Zomato Hyderabad Restaurant Analysis | Python, Pandas, Matplotlib, Seaborn

- Analyzed Zomato restaurant data for Hyderabad to understand ratings, cuisines, pricing and locations.
- Cleaned data with Pandas and visualized insights using Matplotlib and Seaborn.

Fresher Skill Gap Checker | Next.js, React, Tailwind CSS, Vercel

- Built and deployed a web app where freshers paste a job description, pick their skills and see matched and missing skills with a match percentage.
